Professional Summary

M.Sc. Data Science student at TU Hamburg with over one year of experience in software development and applied NLP research. Skilled in Python, JavaScript (MERN stack), and Machine Learning, with hands-on experience building scalable web applications and AI-driven solutions. Passionate about developing data-driven products and eager to contribute as a Working Student in Software Engineering or Data Science.

Work authorization: Student residence permit – allowed to work 20 hours/week.

Work Experience

AI/NLP Research Analyst, <i>DHIRUBHAI AMBANI INSTITUTE OF INFORMATION AND COMMUNICATION TECHNOLOGY</i> - Developed NLP pipelines for Hindi-Gujarati language translation using Python. - Annotated and curated Gujarati datasets for Named Entity Recognition (NER) and linguistic parsing. - Collaborated with IIT Hyderabad to improve data quality for low-resource language processing. - Automated annotation workflows to increase efficiency and consistency of labeled data.	06/2024 – 08/2025 Gandhinagar, India
Mathematical Analyst (Calculus & Statistics), <i>CHEGG</i> - Solved advanced problems in Calculus and Statistics for global learners using Microsoft Excel. - Delivered clear, step-by-step mathematical explanations to improve student understanding. - Strengthened analytical thinking and problem-solving through high-volume technical problem solving. - Maintained high solution accuracy and quality under strict deadlines.	11/2023 – 11/2024 Remote
Internship - Software Developer, <i>DHRUSOFT</i> - Built full-stack web applications using MongoDB, Express.js, React, and Node.js. - Developed REST APIs and implemented backend logic using Node.js and Python. - Collaborated on live projects and contributed to feature development and debugging. - Improved application performance and usability through testing and code optimization.	12/2023 – 06/2024 Anand, India
Internship - Backend Developer, <i>ALIAN SOFTWARE</i> - Developed backend services using Node.js and Express.js. - Integrated third-party APIs and implemented email services using Nodemailer. - Built and tested backend modules for real-time web applications. Gained hands-on experience with CORS, REST APIs, and server-side architecture.	06/2022 – 12/2022 Anand, India

Education

Master of Science in Data Science, <i>Technische Universität Hamburg</i> Relevant coursework: Machine Learning, Statistical Modeling, Big Data, Deep Learning	10/2025 – 03/2028 Hamburg, Germany
Bachelor of Technology in Computer Engineering, <i>Gujarat Technological University</i> Relevant coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks, Machine Learning Final grade 8.07	08/2020 – 06/2024 Anand, India

Skills

PROGRAMMING Python, JavaScript, Java, C++, SQL, PHP, R	WEB DEVELOPMENT Node.js, Express.js, React, MongoDB, REST APIs, HTML, CSS, JavaScript
DATA SCIENCE & ML NumPy, Pandas, TensorFlow, Keras, PyTorch	CLOUD & TOOLS AWS, Azure, Git, Jira, Microsoft Office
DATA ANALYSIS & VISUALIZATION Matplotlib, Power BI, Microsoft Excel	

Achievements

NPTEL Online Certification , <i>Indian Institute of Technology Kharagpur (IIT-Kharagpur)</i> Successfully completed the course on "Introduction to Industry 4.0 and Industrial IoT" with an Elite certification, securing 83% and ranking in the Top 1% of 7,689 candidates.	01/03/2023
Azadi Ka Amrit Mahotsav Hackathon , <i>SSIP-Gujarat Government, India</i> Acted as Team Leader in the SSIP Azadi Ka Amrit Mahotsav Hackathon, securing Runner-Up position by leading the development of a state-level scholarship portal for Gujarat, demonstrating strong leadership, problem-solving, and full-stack development skills.	01/09/2022
Coding Fest , <i>Google Developers Student Clubs, India</i> Achieved 3rd place among 800+ participants in a competitive coding contest hosted by Google Developer Student Clubs, showcasing strong analytical, algorithmic, and programming abilities.	01/07/2022

Projects

Smart Energy Grid Analytics Platform (Duration: 3 Months)  , <i>Energy Consumption Forecasting & Operational Intelligence System (Azure Synapse Analytics, Databricks, PySpark, Power BI)</i> - Developed a big-data analytics platform to process smart meter, consumption, and grid operation data using Azure Synapse Analytics and Databricks. - Built forecasting and anomaly detection models to predict energy demand, identify abnormal consumption patterns, and support data-driven operational decision-making through Power BI dashboards.
AI-Powered Equity Assistant (Duration: 2 Months)  , <i>LLM + RAG Financial Analysis Tool (Python, LangChain, OpenAI, Streamlit)</i> - Developed an AI tool to analyze financial news using LLMs. Implemented Retrieval-Augmented Generation (RAG) with LangChain and OpenAI. - Built a Streamlit interface for interactive, real-time financial insights.
Global Retail Intelligence Platform (Duration: 3 Months)  , <i>End-to-End Data Analytics & Forecasting System (Python, SQL, PySpark, AWS, Power BI)</i> - Developed a retail analytics platform to process and analyze large-scale sales, customer, and inventory data. - Built automated ETL pipelines using Python, SQL, and PySpark for data transformation and reporting. - Implemented customer segmentation and demand forecasting models using Machine Learning techniques. - Designed interactive Power BI dashboards to monitor sales performance, customer behavior, and business KPIs.
StreamFlex (Duration: 4 Months)  , <i>Microservices Streaming Platform (Kubernetes, Terraform, CI/CD)</i> - Developed a scalable media streaming platform using microservices architecture and asynchronous messaging, deployed via Kubernetes with Terraform-based infrastructure and CI/CD pipelines to ensure high availability and reliable production delivery. - Implemented automated testing frameworks, including unit and integration testing with Jest and end-to-end testing with Cypress, integrating all test suites into the continuous delivery pipeline to improve code quality and deployment stability.
